SELECTION PROCEDURES

Background

We don't rely on agents. This is aimed at providing neat and hassle-free services to employment seekers based on the country's Labour Act. In the beginning, we mobilize our own official network and regional desks for sourcing. Every day, hundreds of youth come to our company for overseas employment. And, some people apply through email, website: in Job Seeker Portal and download their bio-data and work experience. Basically, we select manpower through trade tests and other procedures.

If special manpower with specific experience is needed, we use our official network located in different districts. We also headhunt for specialized and professional manpower. Headhunting does not limit only in the domestic market but worldwide for supplying the need of highly professional manpower. We supply manpower only to those countries opened for foreign employment by the government of Pakistan.

We apply three interview techniques for the selection of short-listed candidates. I . Video Conferencing: We are the first Pakistani company to introduce the Video interview technique to provide prompt services to our valued clients. This is for those who are too busy to come to Pakistan to interview the candidates selected in preliminary selection. We make every arrangement for the interview between employers and the employee through video conferencing. This interview system will be applied for professionals only.

"Note: We provide every worker the cap of printed with Elahi Enterprises and a T-shirt with the logos of Elahi Enterprises and the employing company. This helps the receiving company to identify their workers in the concerned airport."

Trade Test for Skilled Workers

We form a selection committee before making a final decision for appointment. The selection committee includes representatives from different departments of the company and from our Elahi Enterprises. The selection committee carries out skill tests of all skilled manpower in the concerned discipline. Only those persons recommended by the selection committee are selected for overseas employment.

Behavioral Assessment

We use different techniques to know the discipline level of each and every worker so as to avoid possible risks from the workers abroad. We examine the workers' morality, attitude, behavior and personal history. Team of our experts including a psychiatrist carries out these tests.

Candidates have to go through different processes after final selection. This is aimed at selecting competent, disciplined

and healthy manpower desired by an employer. Medical check-up too is one important process. We recommend all short-listed candidates for medical examinations in the government-approved hospitals. Only medically fit candidates are eligible to sign an agreement. We disqualify medically unfit candidates. We personally ask selected candidates to know whether anyone is suffering epileptic fit, which cannot be tested medically. If one is found suffering from the epileptic we don't qualify such person.

The visa endorsement process differs country to country. We dispatch all the documents related to the workers to the company to make a final selection. After employing company confirms and sends the visa confirmation and only then we apply in the concerned embassy or consular office for visa endorsement in the passport. Other processes move ahead after the visa is endorsed by the embassy.

Orientation

Orientation for selected workers on local culture, tradition, social practices and social and religious taboos is essential in the employer's country. We have an inbuilt mechanism for orientation for workers before they are sent to working destinations. It is aimed to make the workers used to the new culture of another country. They have to understand immigration and labor laws as well as rituals, social taboos, tradition and culture of particular country. We have designed courses for the orientation based on the countries and their cultures. We teach our workers about the social practices forbidden by the laws of the land. Orientation is designed to avoid misunderstanding with the local people and for maintaining harmony between the migrant workers and the people of the particular country.

Travel Management

The travel arrangement is the final procedure. After signing of the contract with the employee, we make travel arrangements. This also includes handing over all the documents - original passport, air ticket, and government's final approval letter, to the employee before departure. We train them on all the traveling procedures until they reach their destinations. One is recommended to collect his visa from the visa counter in the concerned airport and to contact immigration authority for visa endorsement in their passport if his visa is not endorsed before departure.
